

# NASA CO<sub>2</sub> sources chart

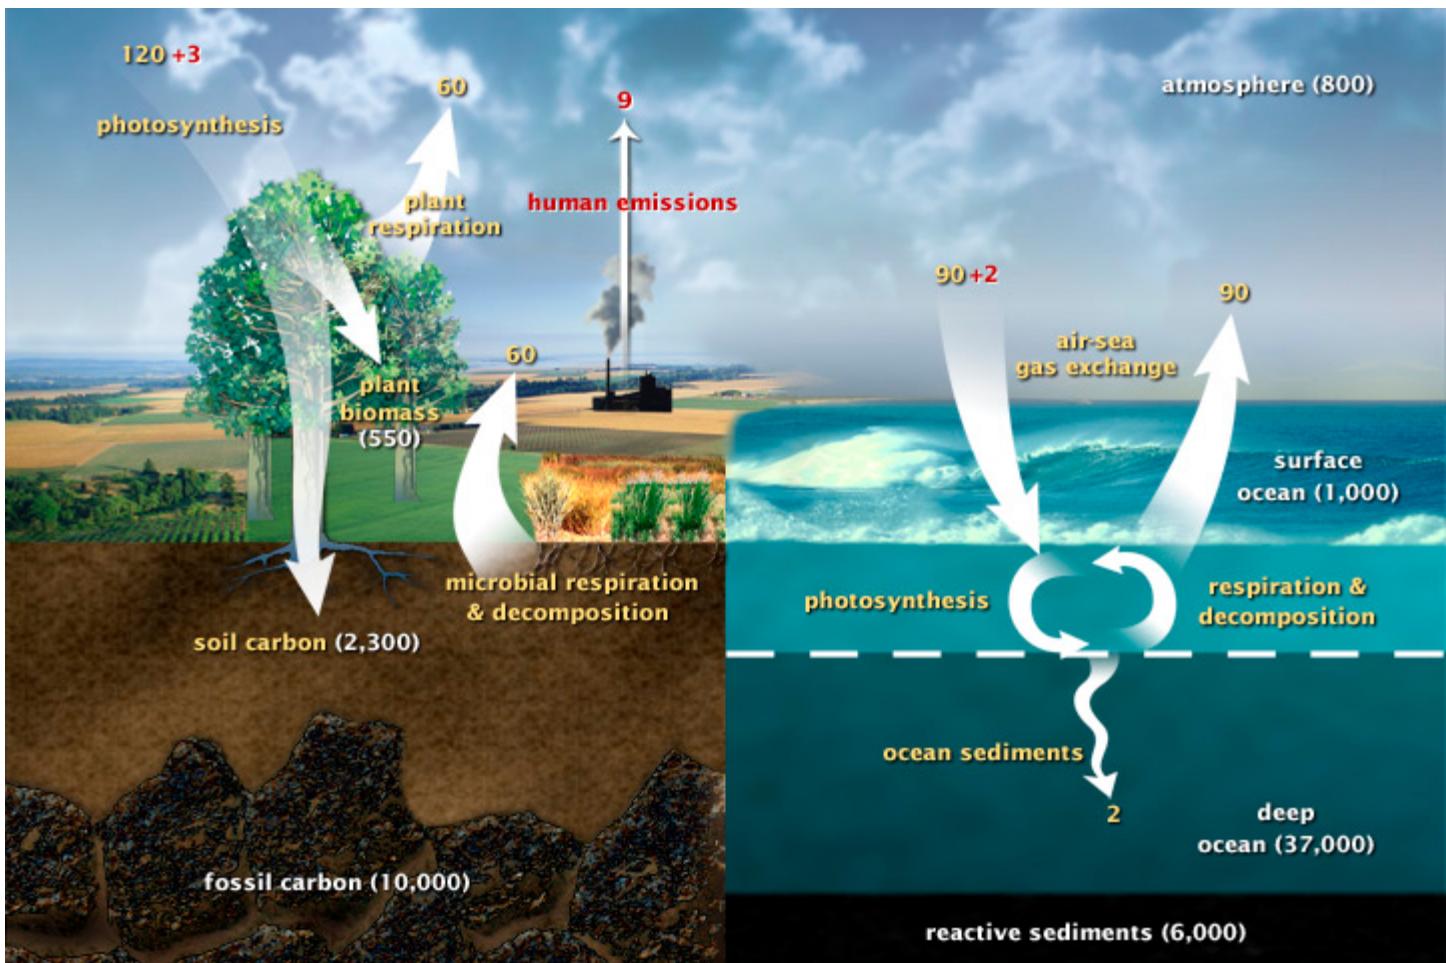

Chart from: <http://earthobservatory.nasa.gov/Features/CarbonCycle/page1.php>

## Data from chart

### Natural CO<sub>2</sub> Sources

|                       |     |
|-----------------------|-----|
| Plant Respiration     | 60  |
| Microbial respiration | 60  |
| Air-sea gas exchange  | 90  |
| TOTAL Natural         | 210 |

### Man's CO<sub>2</sub>

|                 |      |
|-----------------|------|
| Man             | 9    |
| Man's % (9/210) | 4.3% |

$$\text{Do the Math: } \frac{\text{Man-9}}{\text{Total-219}} = \text{Man's Portion: 4.1\%}$$
